Summary

Computer Science graduate and Full Stack Developer specializing in building SaaS platforms, CRM systems, 3D interactive websites, WordPress solutions, Shopify stores, and Unity games. Proficient in Next.js, TypeScript, Node.js, PostgreSQL, and Supabase. Experienced in AI-assisted and prompt-driven development workflows using tools like Claude Code, Cursor, OpenAI Codex, and Google AI Studio to architect, build, debug, and ship full-stack products at speed. Also experienced as an Associate Business Developer, bridging client requirements and technical execution across multiple software projects.

Professional Experience

03/2025
Lahore

Associate Business Developer
White Box Tech

- Collaborated with Full Stack, Mobile App, AI, Python, .NET, and UI/UX teams to understand project requirements and technical solutions.
- Analyzed client requirements and translated business needs into detailed technical briefs for development teams.
- Participated in project discovery, solution planning, scope definition, and effort estimation discussions.
- Worked closely with developers and designers throughout the project lifecycle to ensure successful delivery.
- Gained exposure to SaaS platforms, AI applications, mobile apps, web applications, and enterprise software solutions across multiple industries.
- Managed client communications, requirement gathering, and stakeholder coordination while maintaining alignment between business objectives and technical implementation.

03/2024 – 02/2025
Lahore

Junior Game Developer
Wyze Sol

- Developed interactive web experiences and custom digital solutions using modern development technologies.
- Built responsive and user-friendly interfaces while collaborating closely with designers and developers.
- Worked on 3D web experiences and animation-driven projects.
- Participated in debugging, optimization, testing, and deployment activities.
- Contributed to improving application performance and user engagement.

Projects

Freelancer CRM
Github: *https://github.com/ahmad-008/freelancercrm.git*
Tech Stack: Next.js, TypeScript, Three.js, Shadcn UI, Node.js, Supabase

- Developed a complete CRM platform for managing clients, projects, and workflows.
- Built responsive dashboards and user management modules.
- Implemented backend APIs and database integration using Supabase.
- Leveraged AI-assisted development tools, including Claude Code, Cursor, OpenAI Codex, Google AI Studio, and Antigravity, to accelerate development, debugging, and code optimization.

- Gained hands-on experience with full-stack architecture, database design, authentication, and deployment workflows.

My Study Ally (Ongoing)
Tech Stack: Next.js, TypeScript, Node.js, Cloudflare R2, Neon PostgreSQL, PayFast

- Currently developing a tutoring SaaS platform.
- Building student, tutor, and admin management modules.
- Implementing secure payment processing through PayFast.
- Integrating Cloudflare R2 for scalable file storage.
- Leveraging AI-powered development workflows using Claude Code, Cursor, OpenAI Codex, Google AI Studio, and Antigravity to accelerate feature development and problem-solving.
- Gaining practical experience in SaaS architecture, cloud storage, payment integrations, database design, and scalable backend systems.

Silent Strike (Final Year Project)
Github: *https://github.com/ahmad-008/Silent-Strike-3D-Mobile-FPS-Game.git*
Tech Stack: Unity, C#

- Developed a 3D FPS shooting game using Unity Engine.
- Implemented player movement, combat mechanics, enemy AI, and game environments.
- Applied object-oriented programming principles in C#.
- Designed gameplay systems and interactive game mechanics.

Maha Rani Official (Clothing Brand)
Link: *https://maharaniofficial.com/*
Tech Stack: Shopify, Liquid, HTML, CSS, JavaScript

- Designed, customized, and launched a complete Shopify e-commerce store for a clothing brand.
- Configured store structure, product catalog, collections, navigation, and content management.
- Customized Shopify themes and implemented responsive layouts to improve user experience across devices.
- Optimized product presentation, store branding, and customer purchase flow.
- Managed end-to-end store setup including content integration, store configuration, and deployment.
- Gained practical experience with Shopify ecosystem, theme customization, e-commerce workflows, and online store management.

WyzeSol Agency Website
Tech Stack: Next.js, TypeScript, Three.js, Shadcn UI, Resend

- Developed a custom 3D animated agency website with modern UI/UX.
- Integrated interactive Three.js animations and transitions.
- Implemented email functionality using Resend.
- Utilized Claude Code, Cursor, OpenAI Codex, Google AI Studio, and Antigravity throughout the development lifecycle for rapid prototyping and implementation.
- Strengthened expertise in frontend engineering, 3D web experiences, performance optimization, and responsive design.

Education

2021 – 2025 | **Bachelor of Science in Computer Science**
Lahore | *Lahore Garrison University*

2019 – 2021 | **FSc Pre-Engineering**
Lahore | *Govt. Islamia College Railway Road, Lahore*

2017 – 2019 **Matriculation in Science**
Lahore *Govt. Iqbal High School Garhi Shahu Lahore*

Certificates

Ethical Hacking & Cyber Security Certification
3-Month Professional Training Program

- Network Security Fundamentals
- Ethical Hacking Concepts
- Vulnerability Assessment
- Basic Penetration Testing
- Security Best Practices

Skills

Frontend
- Next.js, React.js, TypeScript, JavaScript
- Three.js, HTML5, CSS3, Tailwind CSS
- Shadcn UI

Databases
- Supabase, Firebase
- PostgreSQL
- Neon PostgreSQL

CMS & E-Commerce
- Shopify
- WordPress

Tools & Technologies
- VS Code
- Git, GitHub

Backend
- Node.js, REST APIs, Chatbot Integration
- Authentication & Authorization
- Payment Gateway Integration

Cloud & Email Services
- Resend
- Cloudflare R2

Game Development
- C#
- Unity

AI-Assisted Development Workflow
- OpenAI Codex
- Google AI Studio
- Claude Code, Cursor

Languages

- English
- Urdu
